Summary

Seasoned software developer, specialized in back-end development. Passionate about Blockchain technologies, smart contracts, automation, and IT infrastructure.

Experience

Automation Specialist
WebDollar

Sep 2018- Present

Working on implementing open-source tools and services that help the community, as well as contributing to the core project.

Achievements:
- Built a **dashboard** for monitoring full nodes
- Automated the deployment and management of the network for testing (Testnet)
- Built the **bounty system**
- Built a Telegram **tipping bot**

A complete list with links can be found here: **https://www.hostero.eu/tools**

Co-Founder
WMP (WebDollar Mining Pool)

Aug 2018- Present

Managing the infrastructure for the mining pool and developing custom modules and software for managing and monitoring nodes.

Founder
Hostero

May 2018- Present

Managing the whole operation, and using this opportunity to develop my soft-skills as well as develop a product from scratch.

Responsibilities:
- Developing and managing the infrastructure for running the software
- Building the various components of the system (**website**, **dashboard**, **API**, workers, **containers**)
- Social media and marketing strategies
- Community management

Full Stack / Blockchain Developer
Eloquentix

Apr 2014- Present

Working closely with clients, and helping them develop products in various stages. I have worked on projects from zero (MVP, POC), and also production ready, large scale ones.

My experience ranges from working with Fintech companies, as well as companies from the energy monitoring and management industry.

Back-end Developer
SimplySocial, a Matchfire Co. company

Mar 2013 - Jun 2013
4 months

Helped with implementing highly scalable and available applications for crawling and aggregating social media accounts using Python and MySQL.

New Media / Full Stack Developer
MMT Digital

Sep 2011 - May 2012
9 months

Created and maintained microsites on Microsoft Sharepoint. Later switched to building educational platforms with PHP and MySQL.

Co-Founder
Codeboxed

Nov 2010 - May 2012
1 year 7 months

Worked on creating mobile applications for various clients, and was a contributor to the Appcelerator Titanium community and one of the first certified developers.

Full Stack / Mobile Developer
Eloquentix

Apr 2009 - May 2011
2 years 2 months

Developed web applications using technologies such as PHP, Javascript, and MySQL. Later switched to developing native iPhone applications using Objective-C and Cocoa Touch.
